RE: UC San Diego Literature Building Electromagnetic Field Safety Review

Dear Dr. Kheifets:

On behalf of the UC San Diego campus, I would like to engage your professional services to review data, render your expert opinion, and provide recommendations regarding electromagnetic fields in the UC San Diego Literature Building. The health and safety of the people who work at UC San Diego are my highest concern, and I encourage your candor in helping the University to determine the appropriate course of action. Enclosed, please find a copy of the one-time payment form authorizing compensation for your services through UCLA payroll.

I ask that your review of this situation be conducted as expeditiously as possible. Before you begin your formal review, however, I would like to ask you to meet with Literature Building faculty and staff to hear their concerns first hand so that, to the extent possible, you can address them in your review. After the review is completed, and you have finalized your findings and recommendations in a written report, we would like you to meet again with the occupants of the Literature Building to go over your conclusions.

My office will be happy to assist you in gathering any information you may need. We appreciate your undertaking this important work.

Kind regards,

A handwritten signature in black ink, appearing to read "Marye Anne Fox".

Marye Anne Fox
Chancellor
